### Powerful features

Empowering Innovation, One Distributed Solution at a Time

#### Security by Authelia

Multi-factor authentication and seamless integration, providing you with peace of mind and secure access to your open source software.

Learn more

#### Always Updated

Automated update system continuously monitors and installs updates, so you never have to worry about missing out on important features or security patches.

#### Active Development

BorgBox supports both industry standard solutions and projects in active development, working with developers to push their projects forward and meet the needs of our clients.

#### Global Reach

BorgBox is designed to be accessible anywhere in the world. Have a tricky situation? Reach out and we can develop a custom solution for your needs.

#### Endlessly scalable

BorgBox's hosting service is designed with scalability at its core. Our infrastructure can seamlessly expand to meet the growing demands of our clients.

15TB

Total Capacity

2

Servers

21GB

RAM per Server

2

Apps

## How it Works

Clients can get their application deployed in a few easy steps

1

**Define** - A client defines their needs and BorgBox engineers develop a personalized solution

2

**Development** - BorgBox engineers work in sprints to develop a baseline implementation of the client's application in a development environment

3

**Deployment** - The client's application is deployed in a production environment and credentials for access are provisioned

4

**Monitor & Scale** - The client's solution is monitored by BorgBox engineers for bug fixes, enhancements, and scalability

## Questions

Have a question? Reach out to our product team and we can discuss how we can create a solution for your unique needs.

- How do I know that my application is safe?
- What kind of encryption do you use?
- Is BorgBox available in my country?
- What are the fees involved?
- What is the distributed computing?
- Who is the team behind BorgBox?
